

U.S. Patent Application No. 10/706,748  
Attorney Docket No. 17511 C  
Page 11

Remarks

Status of Claims:

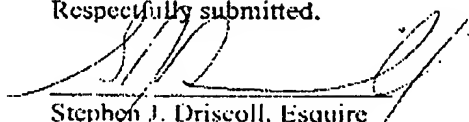

Applicants have amended Claims 26 and 34 to indicate that the module is a transceiver. Support for this amendment can be found throughout the application and in former Claim 41, now cancelled.

Examiner Interview:

Applicants wish to thank the Examiner for participating in an Examiner interview on June 17, 2005. In the interview, the Applicants suggested amending the claims to specify that the module is a transceiver. Applicants emphasized that such an amendment fortifies the arguments previously presented with respect to Hall and Smith being non-analogous art. That is, since the amendment makes clear that the module is a transceiver, the relationship of Smith and Hall to the claimed invention becomes even more attenuated. The Examiner indicated that, before she could allow the claims, she would need to perform another search.

In light of the above remarks, an early and favorable response is earnestly requested.

Respectfully submitted,

Stephen J. Driscoll, Esquire
